

## Finland towards circular economy

- Finland's largest circular economy project: 20 pilot projects, 20 partners.
- Solutions for construction, agriculture, industry, food system and households.
- Regional circular economy roadmaps will be created in four key areas: Southwest Finland, Satakunta, Central Finland, North Karelia region and South Karelia region.
- The Circular Economy Network offers expert services to companies, municipalities and administration.
- Selected municipalities form a group of forerunners.
- CIRCWASTE implements the National Waste Management Plan and steers Finland towards circular economy

## Business opportunities and jobs

Closed, safe material cycle

New products from industrial material flows

Ambitious recycling targets
