## What is LIFE Waste To Resources IP?

*LIFE Waste to Resources IP* introduces targeted measures to reduce waste generation by promoting re–use of resources, improving waste flow control, reducing negative environmental impacts and the carbon footprint of the economy

Implementation period 2022-2028

## **Consortium and technical information**

9 147 210 € EU LIFE Programme financing 5 O36 374 € National financing 1061767 € Project partners financing

## PROBLEM

the amount of waste generated by one Latvian resident per year has increased

- modernised separate waste collection system (demonstration sites)
- building waste remains in circulation (pilot projects, building material circulation system)
- more recyclable materials (novel recycling options, testing facilities, sample products)

- more efficient use of waste (innovative technologies)
- unlocking the potential of biological waste (measurement of food waste)
- management options for slate roofs containing asbestos (training, support program)

# SOLUTIONS

159/2014

MINT-

PROBLEM

plastic consumption has increased 20 times globally since the 1950s

the volume of plastic waste in Latvia has increased by 19% from 2017 to 2019 EU LIFE Integrated Project "Waste To Resources Latvia - boosting regional sustainability and circularity" x20 1950 - 2022

# SOLUTIONS

- valuable business collaboration forms (industrial symbiosis)
- knowledge to eliminate non-recyclable plastics (certified laboratory, data base)

## PROBLEM

in 2021, 52% of the total amount of household waste was disposed in landfills

ia - boosting regional sustainability and circularity"

- solutions for more efficient waste management (new institutional framework for waste management)
- knowledge and sustainability (Replicability and Transferability Strategy)

## PROBLEM

findings reflect the habits of today's consumer society, resulting in significant amount of waste

- secondary use of goods (repair shops and rental centres)
- digital platform for «use again» items
- responsible consumption and smart shopping (behavioral change)

### Awareness-rising 'CIGARETTE BUTTS LITTERING'

#### JŪRA NAV TAVS PELNU TRAUKS! IZMET IZSMĒĶI URNĀ!

- Izsmēķi ir toksiski plastmasas atkritumi, kas dabā nesadalās un turpina piesārņot vidi pat 15 gadu garumā!
- Tabakas izstrādājumi pēc patērēšanas nedrīkst nonākt dabā vai kanalizācijā

   tie jāizmet sadzīves atkritumu konteinerā. Izsmēķi ar plastmasas filtriem ir visizplatītākā piegrajojuma vienība pasaulē.

Stendi izveidoti LIFE projekta "LIFE Waste To Resources IP", LIFE20 IPE/LV/000014 ietvaros ar ES un VRAA finansiàlu atbalstu.
